commercial litigation & dispute resolution

commercial litigation & dispute resolution

The commercial litigation and dispute resolution team brings together a wide range of skills, experience and technical ability.

Traditionally disputes or litigation are seen as time consuming, costly and uncertain as to their outcome. It is important, therefore, to know the likely chances of success before embarking upon such a course. Central to what we do is to exercise our professional judgement in analysing a situation to enable clients to make effective decisions at an early stage.

Our approach is pragmatic and commercial. At the outset, we identify the likely chances of success, how long a matter will take and the likely level of costs. Our aim is to resolve disputes on the most favourable terms for our clients in the most cost effective way possible.

Our experience covers a number of different industry sectors and we are equally at home conducting litigation in the High Court or County Court. We also have considerable experience of resolving disputes by alternative means such as mediation.

Our expertise includes contractual issues, disputes between directors and shareholders and disputes about the quality of goods and services. In all these areas we have achieved notable successes. Working alongside our clients we have been able to put in place effective strategies for avoiding costly disputes.

Our extensive network of contacts means we are able to refer clients to a variety of recognised experts in other professional fields. In addition, we have developed strong links with a number of leading barristers' chambers.

The department has been recognised as one of the leading regional practices in the field of dispute resolution by the Legal 500, the UK's leading legal directory. We have a highly skilled team of experts and our strength in depth means we are able provide a rapid response, for example, where an injunction is needed.

If you thought all law firms were the same take another look. We think you will find our approach to be refreshingly different.

serviceslist
